

Friday, March 20, 2020

Dear Valued partner,

Subject: Communiqué - COVID-19 crisis

As you are aware, Covid-19 is a global pandemic which is causing much harm to many countries around the world. With the recent cases reported in Mauritius, the Government of Mauritius has applied a lockdown position and the country is in Quarantine with limited access, taking effect Friday 20/Mar/2020 @ 06:00 am (local time).

In the superior interest of the country and the whole population and as a token of our participation to the control of the virus, we have decided to stop all face to face interventions during the lockdown

We will do our best to ensure our business continuity, with due regard to the security of our employees and stakeholders in the present circumstances. We will work and conduct business remotely for the foreseeable future until further notice.

Kindly send us all your queries on our customer support e-mail address: contact@corexsolar.com where we shall respond **once** the lockdown position is over or you may send an email to your respective contact person, but we will not entertain any visits or service deliveries during this period.

We have challenging times ahead, but I firmly believe that through co-operation we will overcome them together.

We wish continued health to you and your families in these difficult days and we thank you for your understanding.

Yours sincerely,

Franck Rivas Manzo
Executive Director
