

Corexsolar International Quality & Environmental Policy

Corexsolar International Limited is a limited company incorporated in Mauritius since 2016. We have the ambition of becoming the leader in the Renewable Energy Sector in the Indian Ocean Region. We are known for our Turnkey Photovoltaic Solutions, quality products through our technical expertise.

Our Policy is to provide professional and efficient services meeting the client's requirements and business objectives while complying with applicable Industry legislations and to instil a culture of continual improvement of our management systems.

Our management is committed to embedding the protection of the environment in both the company's and its employees' daily life and endeavors to influence its stakeholders in this sense. Corexsolar commits to protect its natural environment and to minimize the adverse environmental impacts of its activities, products and services.

Our Strengths:

- **Our Scope of Service**
 - We capitalize on our offers for Turnkey Solutions and services across the value chain (We are project developer, IPP, EPC contractor and O&M service provider).
- **Our Structure**
 - We benefit from a lean business model of the organization, controlling our overheads to sustain low activity period.
- **Our Regional Presence**
 - Our presence in Mayotte, Reunion, and Madagascar helps us widen our scope of business and participate in the development of the respective Renewable Energy Roadmap and development projects.

Our Commitments:

- **To our People and their expertise**
 - We leverage and invest on the Technical expertise of our team Engineers to deliver on our commitment to our customers.
- **To our Environment**
 - We contribute to an environmentally friendly business environment and Society at large to achieve sustainable development.
 - Comply with applicable legal requirements and other requirements to which the company subscribes, in relation to the environment.
 - Include the consideration of environmental aspects in all business strategies and Initiatives.
 - Prevent pollution, reduce waste and minimize the consumption of resources.
 - Consider the wider environmental impact of the value chain (from our suppliers to our customers and other stakeholders).
 - Encourage its stakeholders (notably suppliers and subcontractors) to integrate ecology in their strategic agendas, and to improve and monitor the environmental impacts of their aspects and activities.

- **To our Business Growth and continuity**

- We strive to ensure good financial performance and business results and ensure long-term sustainable growth.
